2. Glossary

The Negotiable Debt Paper market or “TCN”: The Negotiable Debt Paper market is the biggest market of continental Europe for short and medium-term paper near to the ECP market in London. It is an over-the-counter market which aims at different types of issuers and maturities of financing :

- (i) Credit institutions with **Certificates of Deposit or “CD”**
- (ii) Public and private corporations, public agencies, local authorities with **Commercial Paper or “BT”**
- (iii) Securitization vehicles with **Asset-Backed Commercial Paper or “ABBT”**
- (iv) Longer financing for credit institutions and other issuers with **Negotiable medium-term notes or “BMTN”**

The liquidity and the transparency of the **Negotiable Debt Paper market or “TCN”** is favored by the legal framework, the supervision by the Banque de France, the efficiency of market infrastructures and the dynamism of issuers, including the non-resident ones.

The **Negotiable Debt Paper market or “TCN”** both allows issuances in EUR or in other currencies and provides a competitive source of financing for issuers.

Certificates of Deposit or “CD”: **Negotiable Debt Paper** with original maturity below one year, issued by resident and non-resident credit institutions, and the Caisse des Dépôts & Consignations.

Commercial Paper or “BT”: **Negotiable Debt Paper** with original maturity below one year, issued by non-financial corporations, insurance corporations, public corporations, public agencies and local authorities.

Asset-Backed Commercial Paper or “ABBT”: **Negotiable Debt Paper** with original maturity below one year, issued by securitization vehicles in order to finance their debt portfolio.

Negotiable Medium Term Notes or “BMTN”: **Negotiable Debt Paper** with original maturity equal to or higher than one year at issuance. This debt instrument can be issued by credit institutions and other issuers.

Original maturity: The original maturity relates to the number of calendar days between the settlement date and the final maturity date for a reported paper.

Residual maturity: The residual maturity relates to the number of calendar days between the latest date of observation and the final maturity date for a reported paper.
