**Chart 3**  
Monetary presentation of the balance of payments

(EUR billions; 12-month cumulated data)

Source: ECB.

Notes: MFI net external assets (enhanced) incorporates an adjustment to the MFI net external assets (as reported in the consolidated MFI balance sheet items statistics) based on information on MFI long-term liabilities held by non-residents, available in balance of payments (b.o.p.) statistics. B.o.p. transactions refer only to transactions of non-MFI residents of the euro area. Financial transactions are shown as liabilities net of assets. "Other" includes *financial derivatives*, *other investment* and statistical discrepancies.

The monetary presentation of the balance of payments (see Chart 3) shows that the *net external assets (enhanced)* of euro area MFIs increased by €151 billion in the 12-month period to June 2020. This increase was mainly driven by the *current and capital accounts* surpluses and, to a lesser extent, by euro area non-MFIs' net inflows in *portfolio investment equity* and *direct investment*. These developments were only partly offset by euro area non-MFIs' net outflows in *portfolio investment debt securities* and by *other flows* (particularly *other investment* net outflows).

In June 2020 the Eurosystem's stock of *reserve assets* increased to €905.0 billion, up from €895.8 billion in the previous month (see Table 3). This increase was driven by positive price changes (€9.8 billion), particularly for monetary gold.

#### Data revisions

This press release incorporates revisions to the data for April and May 2020. These revisions did not significantly alter the figures previously published.

The production of monthly b.o.p. statistics has in most countries been affected by the COVID-19 crisis. The lockdown measures implemented across the euro area have created challenges for the data collection and compilation process. In addition, the abrupt economic impact of these measures has caused particular difficulties for the estimation of infra-annual data, whose releases are therefore subject to higher uncertainty. More information on the potential impact of the COVID-19 crisis on b.o.p. statistics can be found [here](#).

#### Next releases:

- monthly balance of payments: 18 September 2020 (reference data up to July 2020)
- quarterly balance of payments and international investment position: 2 October 2020 (reference data up to the second quarter of 2020)
