EUROSYSTEM

PRESS RELEASE

2 April 2015

Statistics on euro area insurance corporations and pension funds:

Fourth quarter 2014

In the fourth quarter of 2014, the total financial assets of euro area insurance corporations and pension funds increased to €8,842 billion, from €8,649 billion in the previous quarter. Over the same period, the amount outstanding of insurance technical reserves, which are the main liabilities of insurance corporations and pension funds, increased to €7,226 billion, from €7,085 billion. This increase was in part due to an increase of €70 billion in transactions.

Selected balance sheet items of insurance corporations and pension funds

(EUR billions; not seasonally adjusted; amounts outstanding at the end of the period; transactions during the period)

	Amounts outstanding			Amounts outstanding	Transactions ¹
	2014				
	Q1	Q2	Q3		
Total financial assets	8,221	8,462	8,649	8,842	n.a.
Insurance technical reserves ²	6,813	6,946	7,085	7,226	70
net equity of households in life insurance reserves	3,611	3,653	3,711	3,779	34
net equity of households in pension fund reserves	2,331	2,405	2,485	2,571	38
prepayments of insurance premiums and reserves for outstanding claims	870	888	889	876	-1

¹ Transactions are available only for euro area insurance technical reserves.

² Insurance technical reserves contain the provisions against policyholders or beneficiaries set aside by insurers and pension funds to meet future obligations. This item also includes prepayments of insurance premiums, which are related to non-life insurance and to reinsurance, and reserves for outstanding claims, which are the amounts expected to be paid out in settlement of claims, including disputed claims.

Regarding the breakdown of the assets of the aggregated balance sheet of euro area insurance corporations and pension funds, holdings of **debt securities** (securities other than shares) accounted for 41% of the sector's total financial assets at end-December 2014. The second largest category of holdings were **investment fund shares**, which contributed 27% to the total financial assets. Finally, **shares and other equity** accounted for 11% of the total financial assets.

Turning to transactions in the main breakdowns of the **insurance technical reserves**, the **net equity of households in life insurance reserves** increased by €34 billion in the fourth quarter of 2014. The **net equity of households in pension fund reserves** increased by €38 billion in the same quarter, while transactions in **prepayments of insurance premiums and reserves for outstanding claims** decreased by €1 billion.

Regarding the contributions of the two sub-sectors, **insurance corporations' total financial assets** accounted for €6,719 billion at end-December 2014, representing 76% of the aggregated balance sheet of the insurance corporations and pension funds sector, while the **pension funds' total financial assets** amounted to €2,123 billion.

Notes

Further predefined tables, statistical data and methodological notes, as well as the advance release calendar, are available on the ECB's website at <http://www.ecb.europa.eu/stats/money/icpf/html/index.en.html>.

1) Figures may not add up due to rounding.

2) Includes reinsurance.

3) Prepayments of insurance premiums are related to non-life insurance and to reinsurance. Reserves for outstanding claims are the amounts expected to be paid out in settlement of claims, including disputed claims.

4) The net worth is calculated as the difference between total assets (financial and non-financial) and liabilities, and may also reflect statistical discrepancies.

Note: Unit-linked insurance contracts do not guarantee a return to the policyholder, but rather offer a return which depends on the performance of the underlying portfolio.

In a defined-contribution pension scheme, the participant's contributions are determined in advance, but the level of pension payments is not.

In a defined-benefit scheme, future pension payments are determined in advance, based, for example, on the wage history and years of service of a participant.

A hybrid scheme is a combination of the two previous types of pension scheme described above.
