

PRESS RELEASE

21 March 2016

Euro area monthly balance of payments (January 2016)

- In January 2016 the current account of the euro area recorded a surplus of €25.4 billion.¹
- In the financial account, combined direct and portfolio investment recorded decreases of €8 billion in assets and €54 billion in liabilities.

Chart 1: Balance of payments of the euro area: 12-month cumulated transactions
(as a percentage of GDP)

Current account

The *current account* of the euro area recorded a surplus of €25.4 billion in January 2016 (see Table 1). This reflected surpluses for *goods* (€27.6 billion), *primary income* (€4.7 billion) and *services* (€3.6 billion), which were partly offset by a deficit in *secondary income* (€10.5 billion).

¹ References to the current account are always to data that are seasonally and working day-adjusted, unless otherwise indicated, whereas references to the capital and financial accounts are to data that are neither seasonally nor working day-adjusted.

The 12-month cumulated current account for the period ending in January 2016 recorded a surplus of €316.1 billion (3.0% of euro area GDP), compared with one of €254.5 billion (2.5% of euro area GDP) for the 12 months to January 2015 (see Table 1 and Chart 1). The increase in the *current account* surplus was largely due to an increase in the surplus for *goods* (from €260.7 billion to €320.2 billion) and, to a lesser extent, a decrease in the deficit for *secondary income* (from €139.0 billion to €131.0 billion) and an increase in the surplus for *primary income* (from €63.7 billion to €65.7 billion). These were partly offset by a decrease in the surplus for *services* (from €69.0 billion to €61.1 billion).

Financial account

In January 2016 *combined direct and portfolio investment* recorded decreases of €8 billion in assets and €54 billion in liabilities (see Table 2).

Euro area residents recorded an increase of €8 billion in *direct investment* assets, as a result of an increase in *equity* (€15 billion), which was partly offset by a decrease in *debt instruments* (€8 billion). *Direct investment* liabilities decreased by €8 billion, on account of the decrease in *debt instruments* (€18 billion), which was partly offset by an increase in *equity* (€10 billion).

As regards *portfolio investment* assets, euro area residents made net sales of foreign securities amounting to €15 billion. This resulted from net sales of *short-term debt securities* (€39 billion) and, to a lesser extent, *equity* (€2 billion). These were partly offset by net acquisitions of *long-term debt securities* (€25 billion). The decrease of €45 billion in euro area *portfolio investment* liabilities was due to non-euro area residents' net sales/amortisations of both *equity* and *long-term debt securities* issued by euro area residents (€42 billion and €12 billion respectively), which were partly offset by net acquisitions of *short-term debt securities* (€8 billion).

The euro area net *financial derivatives* account (assets minus liabilities) recorded positive net flows of €10 billion.

Other investment recorded increases of €140 billion in assets and €212 billion in liabilities. These were largely driven by similar increases in the *MFI* sector (*excluding the Eurosystem*).

The [Eurosystem's stock of reserve assets](#) increased by €15 billion in January 2016 (to €659 billion). This can mainly be attributed to positive revaluations of gold prices (€17 billion), which were partly offset by net sales of reserve assets (€1 billion) and by asset price and exchange rate developments for other reserve assets.

In the 12 months to January 2016 *combined direct and portfolio investment* recorded cumulated increases of €701 billion in assets and €290 billion in liabilities, compared with increases of €658 billion and €558 billion respectively in the 12 months to January 2015. This resulted from a large increase in the *direct investment* activity of both euro area residents abroad and non-residents in the euro area, with the

net acquisition of assets increasing from €176 billion to €388 billion and the net incurrence of liabilities increasing from €132 billion to €332 billion.

The developments in *portfolio investment* were quite different. The net acquisition of foreign *securities* by euro area residents decreased from €482 billion to €313 billion, mainly as a result of a decrease in the net acquisition of *equity* (from €125 billion to €10 billion). On the liability side, the net acquisition of euro area securities by non-residents (€426 billion) shifted to net sales (€42 billion), which can be explained by the combination of lower acquisitions of *equity* (€129 billion, down from €321 billion), an increase in the net sales of *short-term debt securities* (from €37 billion to €87 billion) and a shift in *long-term debt securities* from net acquisitions (€142 billion) to net sales (€84 billion).

According to the monetary presentation of the balance of payments, the [net external assets](#) of euro area MFIs decreased by €65 billion in the 12 months to January 2016, compared with an increase of €168 billion in the 12 months to January 2015. This development in MFIs' net external assets continued to primarily reflect the surplus in *current and capital account* balance, which has in the last 12 months been offset by, among other things, a shift from net acquisitions by non-residents of *debt securities* issued by euro area non-MFI residents (€104 billion) to net sales/amortisation (€83 billion) and a decrease from €241 billion to €110 billion in net acquisitions by non-residents of euro area *equity*.

Data revisions

This press release incorporates revisions for the period from October 2015 to December 2015. These revisions have not significantly altered the figures previously published.
