Notes:

- The SPF is conducted on a quarterly basis and gathers expectations for the rates of inflation, real GDP growth and unemployment in the euro area for several horizons, together with a quantitative assessment of the uncertainty surrounding them. The participants in the survey are experts affiliated with financial or non-financial institutions based within the European Union. The survey results do not represent the views of the ECB's decision-making bodies or its staff. The next Eurosystem staff macroeconomic projections will be published on 14 December 2017.
- Since 2015 the results of the SPF have been published on the ECB's website. For surveys prior to the first quarter of 2015, see the ECB's Monthly Bulletin (2002-14: Q1 – February, Q2 – May, Q3 – August, Q4 – November).
- The SPF for the fourth quarter of 2017 was conducted between 2 and 6 October. The total number of responses was 58, which is in line with the average number of responses to surveys in the fourth quarter of a year (59).
- The SPF report and data are available via the [SPF webpage](#) and via the ECB's [Statistical Data Warehouse](#).
