

Turnover in retail trade at the end of March 2018

16 April 2018

Turnover in retail trade picked up

Over the past three months, turnover in retail trade picked up by 1.1% (adjusted for seasonal and working-day variations), driven by the 1.1% rise in food sales. Industrial goods sales rose by 0.5%, thanks to both a 2.7% increase in pharmaceutical sector sales and a 1.6% growth in footwear sales. Sales of supermarkets and hypermarkets were particularly robust.

In March, both food and industrial goods sales put on 2.5%. Turnover was particularly strong in the consumer electronics (10.4%), household appliance (7.6%) and watches-jewellery (9.1%) sectors. Sales of large general retailers rose by 2.5%, underpinned by a 3.6% rise in supermarket sales and a 3.4% increase in hypermarket sales.

Total industrial goods and food sales: Q/Q-1 change

The past three months compared with the previous three; seasonally and working-day adjusted volume terms

	Weight
Food products	43%
Industrial goods o/w	57%
Textiles and clothing	10%
DIY	7%
New automobiles	6%
Consumer electronics	5%
Perfumes and hygiene products	4%
Furniture	4%
Pharmaceuticals	3%
Household appliances	3%
Automobile equipment	3%
Footwear	2%
Optical equipment	2%
Press and stationery	2%
Watches, clocks and jewellery	2%
Sports equipment	1%
Books	1%
Games and toys	1%
Bicycles and motorcycles	1%

Notes :

- Sectors are classified according to the relative weight of the products included in the total aggregate of retail trade (see methodology)
- The aggregated and by sub-sector series are seasonally adjusted on an individual basis: the seasonally adjusted series do not represent the sum of the seasonally adjusted components.

Retail trade by certain outlet category: Q/Q-1 change

The past three months compared with the previous three; seasonally and working-day adjusted volume terms

Large general retailers	Weight
Hypermarkets	50%
Supermarkets	33%
Distance sales	11%
Department stores	6%

Distance sales

Source: Fevad and Banque de France

index in seasonally-adjusted volume terms (100 = 2010)

Provisional data as of the 7th working day following the month under review.

Notes:

- The Fevad and the Banque de France work together to publish data on product distance selling, including online sales, in France (excluding food sales).
- The aggregated and by sub-sector series are seasonally adjusted on an individual basis: the seasonally adjusted series do not represent the sum of the seasonally adjusted components.
- Sectors are classified according to the relative weight of the distribution methods included in the aggregates for small retail stores and large general retailers (see methodology)
- However, the "large general retailer" aggregate is not a sub-aggregate of the "total industrial and food product" index. Rather, it is an independent index that covers the overall turnover of hypermarkets, supermarkets, department stores and distance selling. It does not cover national chains.
