

2 June 2017

### Slight decrease in the remuneration of the deposits

The average interest rate on bank deposits decreases again slightly in April (0.72%, after 0.74% in March). This movement is observed on household deposits (0.96% in April, after 0.97% in March) and on non-financial corporations deposits (0.39% in April, after 0.41% in March). For both households and non-financial corporations, this diminution is only driven by the change in the remuneration of term accounts, while the remuneration of other deposits is stable.

### PEL

In %

\* The regulatory formula of the rate of the PEL (home savings plans) is the maximum of the following two terms:

- 70% 5-year swap rate + 30% (10-year swap rate - 2-year swap rate), rounded up to the nearest 1/4 percentage point,
- 1 %
