

Balance of payments – France • July 2018

Current accounts are positive in July

The current account posted a surplus in July, at 0.5 billion euros, after a deficit of 2.3 billion in June (seasonally and working-day adjusted data). The deficit in goods lessened (-2.8 billion, after -4.7 billion in June), due in particular to goods excluding energy (+0.6 after -0.7), supported by strong net export from the aircraft industry (3.6 billion in total, non swda data).

Moreover, the surplus in services became larger (2.5 billion, after 1.6 billion).

The financial account (non-adjusted data) showed a decrease in flows of French direct investments abroad, from 23.6 billion in June (an exceptionally high level due to a sizeable operation) down to 4.7 billion in July. Foreign direct investments in France were nearly unchanged at 3.1 billion after 2.9 billion. Portfolio investments ended the month with net outflows of 17.6 billion, while loans and deposits posted net inflows of 14.9 billion.

France's balance of payments

(EUR billions)	2016 (a)	2017 (a)	Jun-18 (b)	Jul-18 (b)
Current account (seasonally and working-day adjusted)	-16.8	-13.1	-2.3	0.5

The series shown on this chart have been seasonally and working-day adjusted .

Methodological notes relating to page 1 table

(1) Data on trade in goods are FOB-FOB values, which means without cost, insurance and freight. This expenditure is recorded in the services item. Exchanges of goods cover General merchandise published by the Directorate General of Customs and Excise (DGDDI) on one side, merchandising and methodological adjustments calculated by the Banque de France, on the other side. In order to ensure the comparability of French balance of payments with those of other countries and conformity with the international standards, the international standard for Balance of Payments statistics is released under the aegis of the International Monetary Fund. The key concept for the balance of payments is the concept of economic ownership which is consistent with the national accounts.

(2) Services other than travel (tourism and professional travels), transport services, professional and management consulting services, R&D and development and technical services, trade-related and other business services include manufacturing, maintenance and repair, construction, insurance and pension services, financial services, charges for the use of intellectual property, telecommunication, computer and information services, personal, cultural and recreational services and government goods and services.

(3) Income includes primary and secondary incomes. Primary income refers to the flows received by economic agents for their participation in the production process ("compensation of employees") or for the provision of financial assets ("investment income") or for the rental of natural resources ("rent"). Taxes and subsidies on products and production are also included in primary income. Secondary income records current transfers between residents and non-residents. A transfer is a transaction that involves the provision of a good, service, financial asset or another non-produced asset without receiving something of economic value in exchange.

(4) The "other investment" (loans and deposits) component of the financial account includes all transactions in financial assets and liabilities with non-residents that do not concern direct investment, portfolio investment, financial derivatives or reserve assets. In practice, this mainly concerns bank deposits and interbank lending, as well as loans and deposits made by insurance companies and all kinds of investment companies and funds.
