France, share in the total outstanding amount of revolving credits

## Annual growth in consumer credit to households

Annual growth rate in %, incl. securitized loans for France, excl. securitized loans for the other countries and the euro area

## Additional information

The total outstanding amount of consumer credit to individuals includes the outstanding amount of securitised loans. Besides the specified or unspecified personal loans, the ordinary overdrafts and revolving loans, it includes installment loans, leases and credit card loans. Since December 2014, hire-purchase sales and specific-purpose personal loans are grouped together. In June 2019, these amounts have been subject to a methodological revision. They are adjusted for seasonal variations.

Households consist of individuals and sole traders. Given that there are no European data solely on outstanding amounts of loans to individuals, the comparison of credit growth is made on the basis of households.

The average interest rates by country for revolving loans and overdrafts also include credit card loans and cover new loans to households and non-profit institutions serving households (NPISH).

The interest rates for installment loans to households and NPISH relates to new contracts, at fixed rates only for the United-Kingdom, at all rates for France and euro area. The average fees are obtained by calculating the difference between the annual percentage rate of charge (APRC) and the narrowly defined effective rate (NDER) on new personal loans to households and NPISH. The market shares of the different types of distributor network are calculated using the outstanding amount of revolving credit to individuals.
