## Additional information

Non-financial corporations include all companies, whose main activity is the production of goods and non-financial services, excluding sole proprietor and unincorporated partnerships whose assets and liabilities are inseparable from those of the household to which they belong.

The credits referred to in this publication are those granted by resident monetary financial institutions to French non-financial corporations.

Growth rates are calculated by correcting the effects of changes not resulting from economic transactions, particularly write-offs/write-downs, population changes, but take exchange rate effects into account.

The weighted average interest rates and new business volumes are calculated according to the harmonized definitions of the Eurosystem. Published interest rates are the narrowly defined effective rates (NDER). They correspond to the interest component of the Annual percentage rate of charge (APRC).
