

Performance of investment funds – France • February 2019

The performance of non-money market funds continues to recover

The annual performance of non-money market funds recovers but remains negative in February (-1.2% after -3.9% in January). This lower decrease is mainly due to equity funds (-3.2% in February after -9.1% in January), mixed funds (-2.3% after -4.8%) and employee savings funds (-2.1% after -5.7%), which benefit from the recovery of equity markets.

The performance of money market funds is almost stable (-0.25%).

Additional information

The different categories of funds under review are defined by the Autorité des Marchés Financiers (AMF – French Financial Markets Authority). The classification of each fund is based on its real risk exposure. The definition of the exposure and the risk thresholds for each category are developed in AMF Instructions 2011-19, 2011-20 and 2011-21. The **Stoxx 600 index** comprises 600 companies residing in 18 European countries.

The **Barclays index** comprises sovereign and quasi-sovereign bonds, corporate bonds and asset-backed securities. It includes securities denominated in 24 currencies, issued from developed and emerging markets. The rating of the securities is “investment grade” with residual maturity over one year.

The performance of these indexes is measured as the total return (price variation and reinvested dividends/coupons).
