Total (f)	737,3	555,2	582,6	700,5	714,5	838,6

(a) These statistics are transmitted to the European Central Bank, on the 15th working day following the end of the month to which they relate, in the framework of the production of the consolidated balance sheet of the monetary financial institutions (Regulation ECB/2013/33).

(b) This item includes the outstanding amounts of market operations.

(c) Including the adjustment linked to the method of accounting used for measuring the euro notes on the liabilities side of the balance sheet of the Banque de France since January 2002.

(d) Since January 2002, banknotes in circulation are treated according to specific euro area accounting conventions to bring them in line with the capital key share. 8% of the total value of euro banknotes in circulation is allocated to the European Central Bank. The remaining 92% is broken down between the NCBs in proportion to their share in the paid-up capital of the ECB.

(e) In accordance with Regulation ECB/2013/33, although coins in circulation are not a liability of MFIs in the participating Member States, but a liability of the central government, coins are part of the monetary aggregates and this liability is to be entered under the category 'currency in circulation'. The counterpart to this liability is a claim on the Treasury and is included within 'remaining assets' (here under the item 'Not broken down by geographical area').

(f) The total of the balance sheet at end-2015 published in March 2016 (710.4 bn) can be calculated by subtracting from the total of the Monthly Statement at end December 2015 (714.5 bn): coins (3,2 bn) and miscellaneous amounts linked to the accounting gap between the statement established in early January 2016 and the Annual Accounts, which include all the year-end entries (0.9 bn).
