

## The average remuneration of bank deposits for the households and the companies remains high

The average interest rate of bank deposits is unchanged in September 2016 at 0.80%. For one year, the remuneration of deposits with agreed maturity over two years, mostly home savings plans, has decreased by 18bp (2.51% in September 2016, down from 2.69% in September 2015) and the one of deposits with agreed maturity up to two years by 11bp (0.38%, down from 0.49%). Thus, the remuneration rate remains globally high compared to the monetary rates, with a gap against the most common rate of refinancing on the interbank market (3-months Euribor) of more than 100bp.
